

# Desert Heat - Volcanic Fire

**The Geologic History of the Tucson Mountains  
and Southern Arizona**  
by  
**David A. Kring**

## ✧ Table of Contents

Preface	
1. Introduction	06
2. The Tucson Mountains	08
3. Types of Igneous Rocks	09
4. Types of Volcanoes	14
5. The Cretaceous Seas of Southern Arizona and the Rocky Mountains Region	18
6. Amole Lake	22
7. Pre-caldera Stratovolcanoes	28
8. The Tucson Mountains Volcanic Caldera	32
Ash-flow Tuffs	33
Chaotic Megabreccias	36
Post-collapse Lava Flows and Magmatic Intrusions	39
9. The Southern Arizona Caldera Field	44
10. How Long Does it Take to Build a Volcano?	46
11. Rock Formations in the Tucson Mountains	48
12. Convergent Plate Margins and the Laramide Orogeny	56
13. Mid-Tertiary Volcanism	60
14. Mineralization	63
15. Porphyry Copper Deposits	66
16. Detachment Faulting and the Roots of the Tucson Mountains Volcanic Caldera	70
17. Ice-Age Mammals	73
18. Recent Sedimentary and Erosional Processes	76
Appendix: Minerals in the Tucson Mountains	78
Glossary	84
References	92
